”

QUALITY IS THE BEST BUSINESS PLAN

“

Monther Awwadeh, CEO & Partner

CEO MESSAGE

Fire extinguishing, alarm, and public safety systems have been among the most important means of protecting properties and lives in the Hashemite Kingdom of Jordan for a decade. This is in line with the urban, commercial, and industrial renaissance in our beloved kingdom, and in response to the advancements in the global fire-fighting equipment industry

It was necessary to have a representative of this progress in Jordan to keep our country at the forefront among Arab and neighbouring countries in this field, safeguarding both local and foreign investments, and ensuring compliance with local and international standards under the supervision of the Jordanian Civil Defence Directorate

Based on this responsibility, Nasr Awadah Factory for Fire Fighting & Safety Equipment was established in 1992. The late Mr. Nasr Abdul Karim Awwadeh founded NAF based on a vision that relies on quality, excellent service, availability of materials and equipment on demand, and enhancing all of this with engineering expertise and experience sourced from global manufacturers represented by the company (NAF) in the Kingdom.

OUR STORY

The story of NAF didn't begin in, 1992 when Nasr Awwadeh founded his company in a small shop in Amman.

Technically, the dream began when he left his job at Jordanian civil defence when he was 40 years old.

When NAF was born, Nasr Awwadeh already had several years of fire and life safety experience behind him, working his way from onsite engineer to a lecturer to a contactor

Combining experience, knowledge and honesty and adhering to the values that still guide us today, NAF has grown steadily until today.

Today, there's no job NAF can't handle, as evidenced by long-term partnerships with industry leaders.

Through growth and success, the corporate mission at NAF has never changed – make the communities where we operate better places to work and live and be the best fire and life safety company possible.

Now, NAF is a leading supplier of fire fighting equipment, fire detection systems, and fire suppression solutions based in Jordan. With over three decades of experience, we have established ourselves as a trusted partner in providing high-quality fire safety products and services to a diverse range of clients across various industries.

At NAF, we prioritize customer satisfaction and safety above all else. We are committed to deliver innovative, reliable, and cost-effective fire safety solutions that meet the highest industry standards.

Our team of experienced professionals are dedicated for providing exceptional service and support to our clients at every step of the process

Finally, the continued provision of fire-fighting services by NAF company would not have been possible without its high efficiency in all its human, material, and technical aspects, as well as its representation of the best global agencies. NAF company has been keen on sustaining and developing this efficiency to be a leading and distinguished entity by adopting all forms of globally recognized best practices, both technically and administratively

Everyone has a story...

BUSINESS VALUES

Having been in business for over, 30 years the company has experienced many changes over the years. One constant that has never changed is NAF's fixed dedication to providing superior fire protection services for all of it's customers. This has been achieved through hard work, excellent service, appropriate equipment, and most importantly, knowledgeable employees who believe that integrity still matters.

Core Values :

- Team work: we trust and support each other, our greatest strength is our motivated team.
- Results oriented: achieving the best results without compromising on quality.
- Integrity: act with ethics and honesty

Mission :

- Saving lives and preventing property losses from adverse effects of fire. by providing the highest quality of firefighting systems and services.

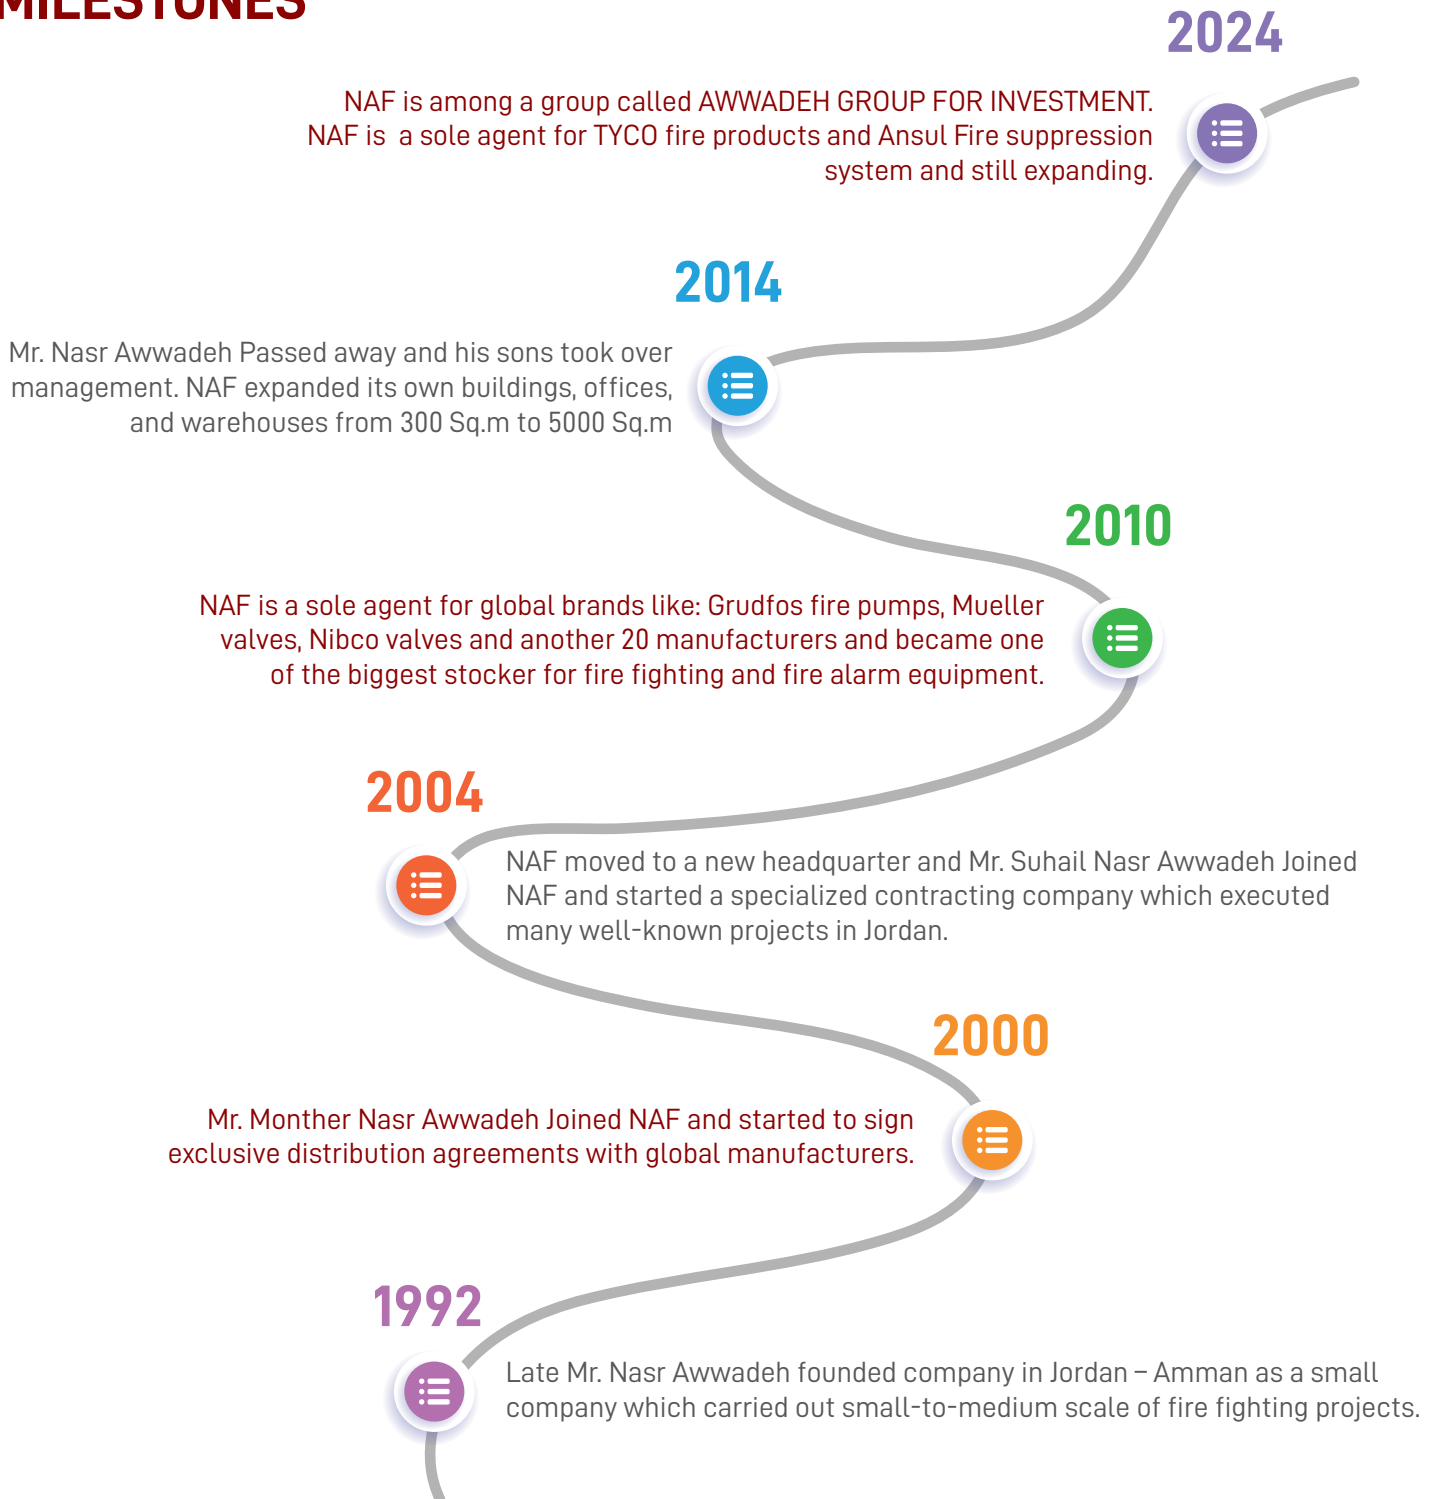

Vision :

- Meeting the expectations of our clients regarding to quality, prices and after-sale services.
- Working as a team to deliver exceptional results to our clients; creating a work environment that is professionally challenging and personally rewarding.
- Acting with integrity, honesty and respect to build long-standing relationships with each other, our clients and business partners.

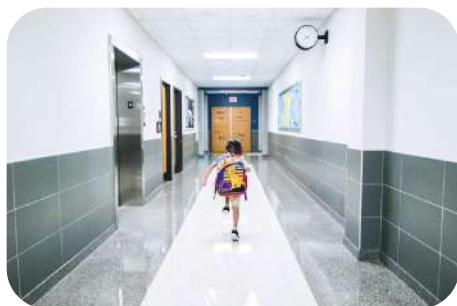

QUALITY POLICY

Our quality policy typically emphasizes the delivery of high-quality products and services that meet or exceed industry standards and customer expectations. The policy would focus on a systematic approach to quality management, ensuring all products and services are reliable, effective, and compliant with both local and international regulations. Continuous improvement through regular training, process optimization, and technological innovation is also a key aspect, aiming to enhance the overall safety and efficiency of fire protection solutions.

MILESTONES

AREA OF EXPERTISE

1. Pharmaceutical facilities
2. Manufacturing Facilities & Industrial sites
3. Data & files Storage Facilities
4. Commercial spaces both new buildings and retrofits
5. Historical renovations and Rehabilitation
6. Healthcare Facilities, Medical Buildings & Hospitals
7. Military building retrofits
8. Museums

9. Cement manufacturing plants
10. Parking Structures
11. Schools/Universities
12. Apartments & Hotels
13. Retail spaces & shopping malls
14. Free zones storage utilities
15. Government sector
16. Banks

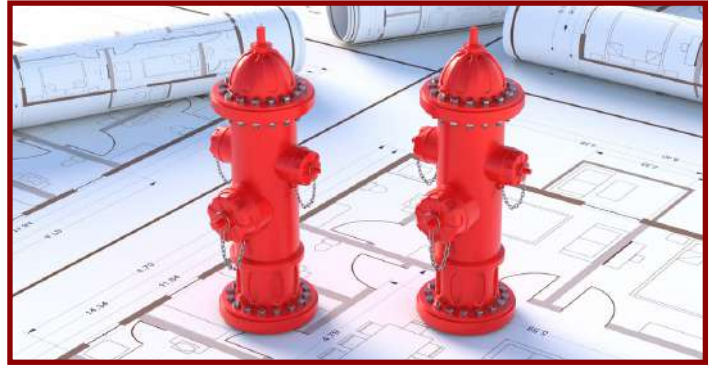

SOLUTIONS & SERVICES

Design

We engineer our fire protection and life safety systems early on – during the design phase – so there are no surprises at installation. At NAF, our technical construction documents are correct to start with, saving time and costs for our customers.

- Coordinate design drawings, specification and calculations.
- Locating equipment and pipe routing to minimize conflicts.
- Assist with any third party reviews.

SUPPLY

Fire doesn't discriminate. Unchecked, it takes down any property, possession, or person in its path. At NAF, our job is to stand in its way — detecting and stopping fire as fast as possible — to save priceless lives and valuable property. When you entrust us with the irreplaceable, we accept our responsibility with a promise and commitment to protect you by providing

- Water Based fire fighting systems including sprinklers, valves, hydrants, pumps, deluge & pre-action valves...etc.
- Fire alarm detection systems: conventional & Addressable systems.
- Fire suppression systems: FM-200 , FK5-1-12 , CO2, Inergen...etc.
- Fire fighting by Foam concentrates including bladder tanks, valves, monitors,
- Fire rated doors.
- All other accessories including flow meters, water flow detectors, test & drain valves, pressure gauges, flexible connections,

INSTALL

Fire sprinkler and life safety systems are unique to each project, so we always specify quality, proven products tailored to each customer's specific needs.

NAF employs expertly trained and highly professional installation technicians to ensure the system is installed on schedule and on time for the needs of the customer.

- Pre-construction planning and project management.
- Preliminary layout.
- Scheduling to meet the needs of the project.
- Adequate manpower to ensure a timely install.
- Commissioning of system(s) and equipment.

MAINTENANCE

When a fire sprinkler or life safety system is in need of regularly scheduled inspection, maintenance or repair, who better to perform those services than experts with proven skills at design and installation?

As an experienced full-service Fire Protection contractor, our professionals can handle any and all aspects of your fire protection, fire alarm and life safety systems, from inspections to testing and maintenance.

INTEGRITY TEST

The fire integrity test is a crucial component of fire safety assessments, ensuring the reliability and effectiveness of fire protection systems in real-world scenarios. At NAF, we understand the importance of conducting thorough fire integrity tests to validate the performance and integrity of fire doors, barriers, and other fire-resistant structures. Our experienced team utilizes state-of-the-art equipment and methodologies to simulate realistic fire conditions and evaluate the ability of these structures to withstand heat, flames, and smoke.

HFC227-EA RE-FILLING SERVICE

A re-filling service for HFC-227ea involves the careful extraction of the spent agent from fire suppression systems, followed by a thorough inspection and maintenance of the storage containers and associated components. The service includes refilling the containers with the precise amount of HFC-227ea required, which is super-pressurized with nitrogen to enhance its discharge flow characteristics. This process ensures that the fire suppression system remains in optimal condition, ready to protect against fire hazards effectively.

MANUFACTURING

The manufacturing of fire hose cabinets & fire rated doors is a specialized process that involves precision engineering and adherence to stringent safety standards. The production process typically includes the fabrication of durable materials like steel or stainless steel, which are then formed into the cabinet and fire rated door structure.

Manufacturing also offers customization options, including door styles, lock mechanisms, and fire-rated materials, to comply with local fire codes and client specifications. The end goal is to provide a reliable and functional product that ensures quick and efficient response times during fire incidents.

CONSULTATION & TRAINING

Consultation and training in fire fighting systems are paramount for ensuring safety in both residential and commercial spaces. Proper consultation ensures that the fire fighting systems are tailored to the specific needs and layout of the building, maximizing their effectiveness in the event of a fire emergency. Our consultation services includes Risk Assessment: Fire safety consultants collaborate with developers, owners, architects, and building code officials to identify risks specific to a facility or project. They assess potential fire hazards, occupancy types, and building layouts.

Code Compliance: Consultants review local and international fire and building codes to ensure that the proposed fire protection systems align with legal requirements.

Custom Solutions: Based on the assessment, they recommend appropriate fire safety solutions, including fire suppression systems, alarms, and evacuation plans.

training equips individuals with the knowledge and skills necessary to operate these systems efficiently and confidently, enabling them to respond swiftly and effectively in high-pressure situations. Regular training sessions also help in familiarizing occupants with evacuation procedures and safety protocols, ultimately reducing panic and minimizing the risk of injury or loss of life.

In summary, effective consultation and ongoing training enhance fire safety, protect lives, and safeguard properties against fire incidents.

COMPREHENSIVE PRODUCT RANGE

Having a comprehensive range of products ensures that all potential fire hazards are addressed effectively. From advanced fire detection & sprinklers systems to reliable fire extinguishers and suppression systems, these products are designed to protect both residential and commercial spaces. Whether it's water, foam, or gas suppression systems, having a variety of options allows for tailored solutions to meet specific safety needs. All of these products have third party approvals.

FIRE FIGHTING SPRINKLERS :

upright , pendent , concealed , nozzle , sidewall and storage sprinklers.

FIRE FIGHTING EXTINGUISHERS

Dry powder , CO2 , foam , wet chemical , mobile , automatic and trolley extinguishers.

FIRE FIGHTING HOSES

Fire hosereel (manual,automatic) , hose rack and canvas fire hose.

FIRE HYDRANTS, VALVES & FIRE DEPARTMENT CONNECTIONS

OS&Y , wafer and swing check , Butterfly ,NRS valves.
Fire hydrants , landing valves, post indicators and fire department connections.

FIRE CABINETS

Single, Double door , Double compartment , galvanized and stainless steel cabinets.

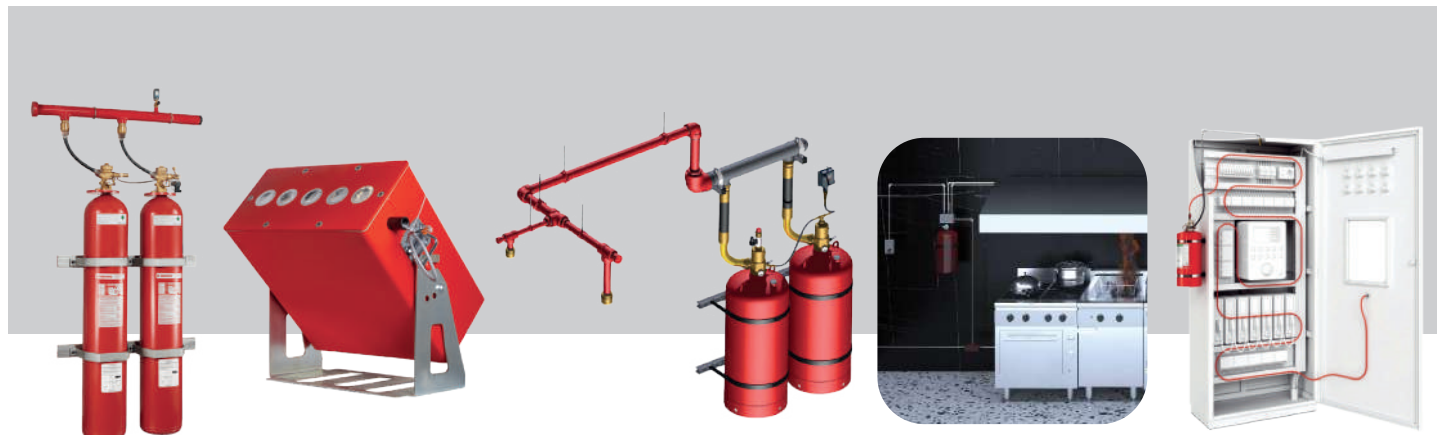

FIRE SYSTEM VALVES AND DEVICES.

Deluge, pre-action , pressure reducing and relief valves.

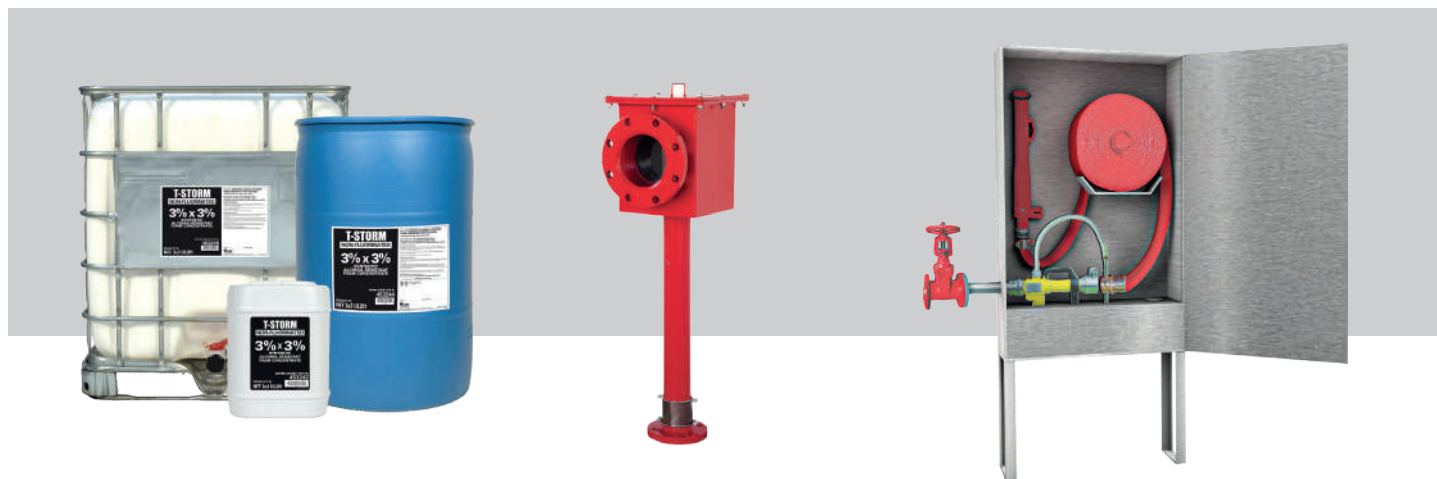

FIRE SUPPRESSION SYSTEMS

FM-200, CO2, FK5-1-12, Aerosol, microsystems and wet chemical suppression systems.

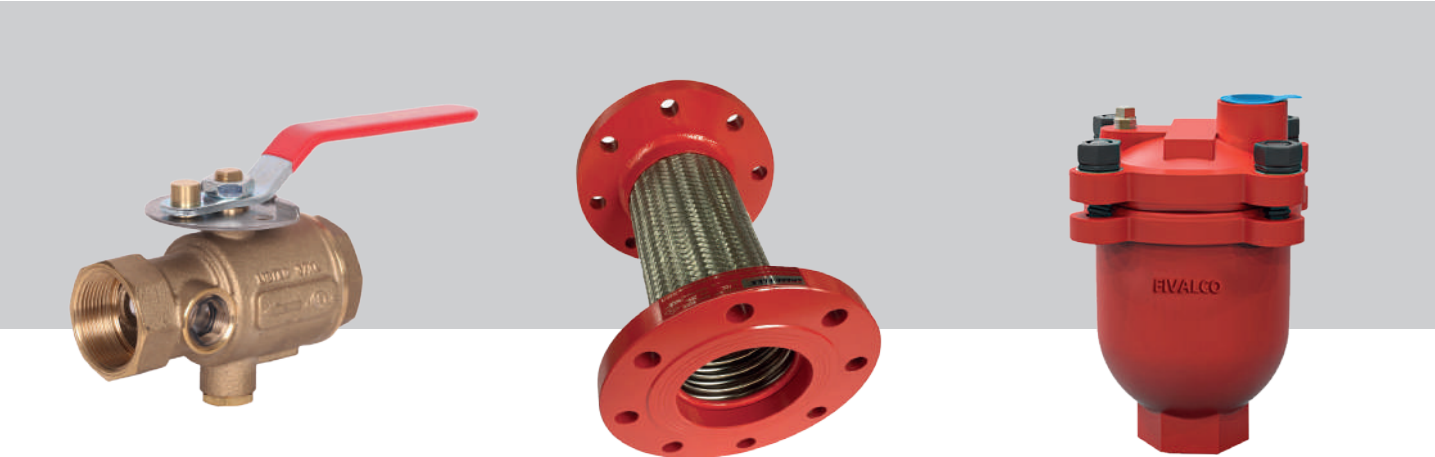

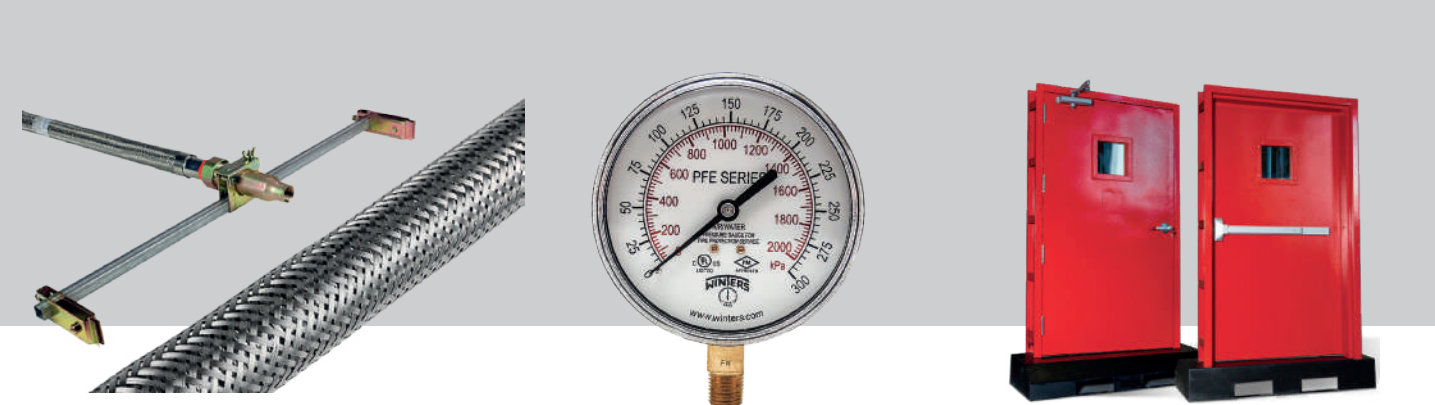

FIRE FIGHTING FOAM EQUIPMENT

Foam concentrate, Bladder tanks, foam generators and chambers, foam monitors and cabinets.

FIRE RATED DOORS & ACCESSORIES

Flexible connections , sprinkler flexible hose , pressure gauge, air valve, test & drain valve , flow and Tamper and Flow meter.

PIPES & FITTINGS

ERW , Seamless and HDPE pipes and fittings .

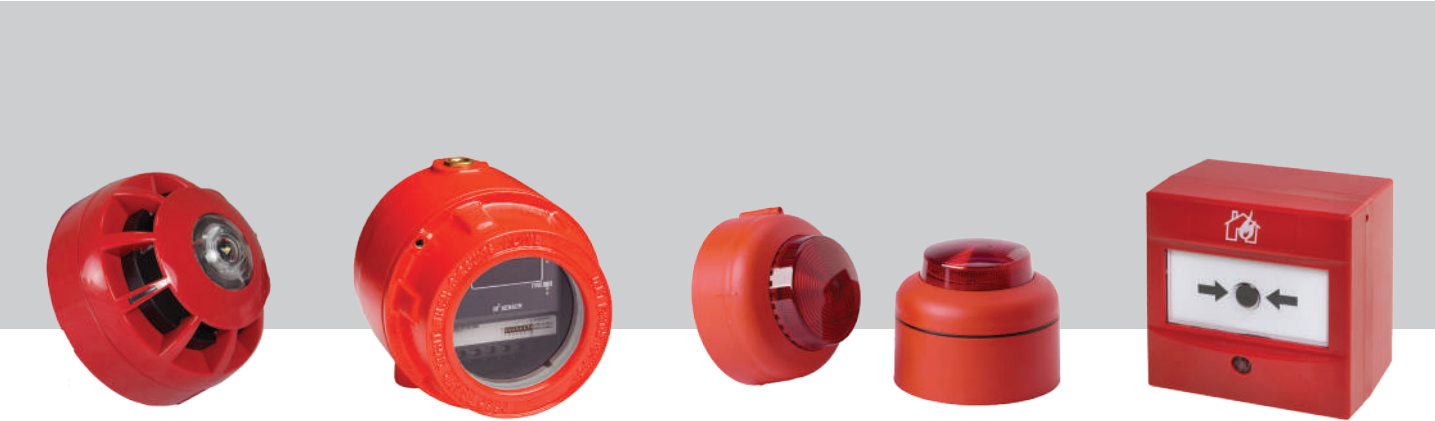

FIRE FIGHTING PUMPS

Horizontal split case , End suction and Vertical turbine multistage fire pump.

FIRE ALARM DETECTION SYSTEMS

Conventional and Addressable fire detection system .

CLIENTS & REFERENCES

Every facility needs fire and life safety systems but buildings come in all shapes and sizes, with risks varying by industry, occupancy and location. NAF has decades of experience across the broadest spectrum of commercial facilities from large industrial warehouses and high-rise office buildings to retail shopping centres, hotels and restaurants. We work in medical as well as data centres, auto dealerships, self-storage facilities and offshore oil platforms. The bottom line is that we know our way around every aspect of fire and life safety, and we get the job done with the highest level of quality customer service.

PARTNERS / MANUFACTURERS

At NAF, we prioritize partnerships with reputable fire fighting manufacturers to ensure that we offer our clients the most advanced and reliable fire safety solutions available in the market. Our strategic alliances with leading manufacturers enable us to access cutting-edge technologies, innovative products, and high-quality equipment that meet the stringent standards of the fire safety industry.

These partnerships also enable us to offer competitive pricing, efficient logistics, and responsive customer support, further enhancing the value we deliver to our clients.
